FindIIT

02

PROBLEMS

What is the Need for this Software?

Who are the Potential Users?

1. Decentralized

Current Lost and Found activities happen through small WhatsApp groups (catering to over 15 reports a week) which largely go ignored

2. No Interactivity

Currently users who have lost an item don't have a way to contact the people who may have found it and vice versa

3. Time Consuming

Searching for the item is a hassle and leads to wastage of time and energy

03

Software Overview

FindIIT is a centralized platform that aims to simplify the process of finding and retrieving lost and found items for the IITK campus community

04

MAJOR REQUIREMENTS

Taking into account the problems being currently faced by users, we have come up with the following requirements

Searchable

Reported Items should be able to be searched for easily

Centralized

Users should be able to interact and communicate to claim/retrieve their items

Secure

Restricted to the campus community to ensure user credibility

Quick

The software should be quick in its function

Administrative Functions

Signin, Login, Edit Profile,
Admin privileges

Claiming and Chatting

Claim/Retrieve an Item, Chat

Software Demonstration

During this demonstration, we will be
touching upon the following features of
our software

SCALABILITY

Design a flexible architecture to support rollout across multiple campuses and institutions.

SMART MATCHING

Implement intelligent item matching using image recognition and keyword analysis

USER ENGAGEMENT

Introduce personalized alerts, simplified reporting, and seamless user experience enhancements

ECOSYSTEM INTEGRATION

Collaborate with campus bodies, integrate with existing systems, and enable API access for third-party tools

IMPROVED SECURITY

Improved security for chats, server side protection and protection from malicious activities.

Future Development Plans

07

Lessons Learnt

SKILL ENHANCEMENT

Tackling real-world issues facilitated the development of valuable, applicable skills

PROBLEM SOLVING

We employed creative strategies to efficiently address and resolve complex issues

TEAMWORK

Our coordinated efforts enabled us to overcome challenges together

SHARED SUCCESS

Celebrating milestones and working closely as a team not only sustained our motivation but also helped build unforgettable memories
